### Plug & Go

Designed for standard & mid-sized (to 5-ton) vehicles, providing real-time location tracking, historical route maps, speeding alerts, ignition status, GeoZone entry/exit notifications, low-fuel alerts, engine code notifications, & tamper/unplug warnings.

### Plug & Go<sup>+</sup> (+\$3/mth)

An enhanced version of Plug & Go, this exclusive device includes all features plus remote door unlock and car-starter command capabilities (check aftermarket starter device for compatibility).

### Mount & Go

A perfect solution for non-powered assets, this tracker offers real-time and interval-based movement reporting, a long-life rechargeable battery (1-3 years per charge), and IP67 waterproof protection. Available with an optional mounting bracket.

### Wire & Go

Ideal for larger (5-ton+) vehicles "without" an OBD2 port, this wired tracker ensures real-time tracking, historical route logs, speeding alerts, ignition status, GeoZone notifications, and an internal backup battery. Easy & quick 3-wire installation

### Wire & Go<sup>+</sup> (+\$3/mth)

Expanding on the Wire & Go, this model adds remote door unlock and car-starter command connectivity (check aftermarket starter device for compatibility) for enhanced vehicle control.

### Mini-Go

Versatile and compact, the Mini Go is perfect for personal, pet, bicycle, motorcycle/ATV, luggage, asset, and shipment tracking. Featuring a long-life rechargeable battery (7-365 days per charge), SOS/Alert button, IP68 Waterproof protection and customizable reports.
